

SmartLock®

QUICK REFERENCE GUIDE

IMPORTANT: In some jurisdictions, the use of a UL approved power supply and connection to the fire alarm system for emergency release may be required. Installers should contact the local authority having jurisdiction to verify the specific requirements. Also, a building permit may be required in some jurisdictions for the installation of magnetic locks.

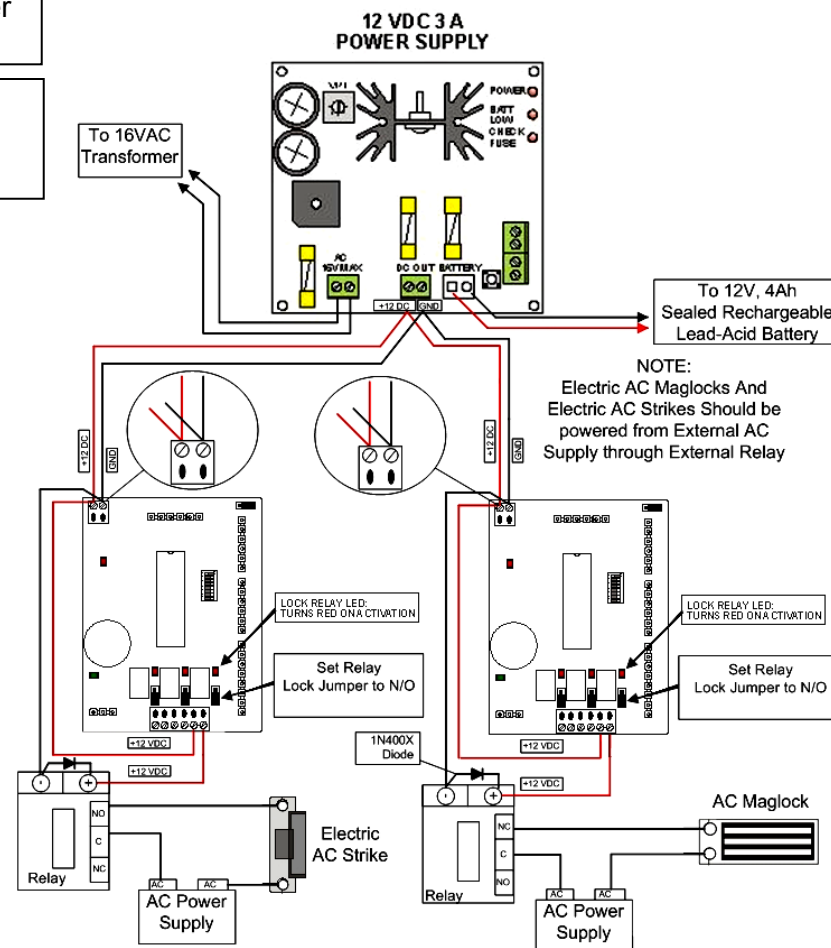

DC ELECTRIC STRIKE AND DC MAGLOCK WIRING EXAMPLES

For locks up to 250 mA the board's internal power supply can be used.

For locks that draw more than 250 mA an external power supply is required.

AC ELECTRICAL STRIKE AND AC MAGLOCK WIRING EXAMPLES

IMPORTANT: In some jurisdictions the use of a UL-approved power supply and connection to the fire alarm system for emergency release may be required. Installers should contact the fire marshal office or local authority having jurisdiction to verify the specific requirements. A building permit may be required in some jurisdictions for the installation of maglocks.
